## Professional Human Capital for the Periphery

### Scholarship for High-Tech Students in the Galilee and the Negev

**KKL-JNF will allot 200 scholarships for the 2020-2021 academic year to students enrolled in high-tech programs at institutions of higher learning in Israel's northern and southern districts, with the intention that they continue to live and work in high-tech industries in the periphery upon graduation. Scholarships will be awarded to computer science and engineering students in their final academic year.**

In the interest of generating demographic change and strengthening Israel's periphery, KKL-JNF has initiated a scholarship project designed to induce high-tech students to study in the Galilee and the Negev. For this purpose, KKL-JNF will allocate 200 scholarships for students' final year of studies at institutions of higher learning at Braude College, Tel Hai College, Kinneret College, Jezreel Valley College and Tzfat College in the northern district and Ben Gurion University, Sami Shamoon College of Engineering, Sapir Academic College and Ashkelon Academic College in the southern district.

Scholarship recipients are committed to remaining in the Galilee and Negev, respectively, and working in high-tech companies for at least one year following graduation. The availability of quality graduates will also serve as a further catalyst for establishing high-tech industries in the Galilee and the Negev.

Cost: NIS 25,000 - 2,500,000

Donors will receive appropriate recognition.

The scholarship project is part of KKL-JNF's comprehensive ISRAEL 2040 plan, whose goal is to attract one million people to the Negev and half a million people to the Galilee, by developing growth engines: high-tech industries, housing infrastructure, institutions and programs for innovative higher education, tourism infrastructure, and landscaped, leisure and recreation environments for quality of life, and mobilizing government and business participation in the endeavor.

KKL-JNF invites you to take part in this meaningful project for the future of Israel.
